

INDEX OF SUBJECTS

- accommodations 253
- adjustments 47-49
 - listing 251ff
- agreement in cross-reference
 - in gender 56-57
 - in number 57-59, 225-226
 - in person 56
- ambiguity 7-9
 - dictionary and grammatical 182-183
 - sublanguage 141-143, 181-182
- anaphora 60ff
 - notation of 242
 - reduction to epiphora 63-64
- announcers 14ff, 212, 400ff (see: zero-referentials)
 - body parts 225
 - comparative forms 213-214
 - notation of 243
 - quantifiers 214-215, 404-405
 - relational nouns 218-219
 - sublanguage 222ff
- assertion 95-97, 190f, 401-403
- assumptions 21-23 (see: implicit sentence)
- citation-numerals 64, 197
- classification of words
 - in immunology sublanguage 135-139, 147ff
 - listing 152
- classifiers 215-222, 408-416
 - conditions on 217ff
 - in methods and materials section 442-444
 - of argument word-classes 216, 219ff
 - of sublanguage sentences 411ff, passim
 - sentence 217
- closure under referentials 172, 444-446, 454, 472-474
- comparative forms 213-214, 425-426

- compound nouns 215
- conjunctive referentials 15, 405-407
- consequence
 - and paraphrase 45-47
 - in analysis 43-35
 - listing of rules 249
 - logical 41
 - provability 40
 - semantic 41-42
- co-reference 24-30
 - compared with cross-reference 28ff
 - strong 24-28
 - weak 28
- cross-reference (see also: referential, referend)
 - definition 49-50, 395ff
 - examples 50-52
- definite article 71-77, 420-422
 - anaphoric 72
 - determinative 72-73, 76ff
 - other uses 73-75
- deixis 33-36
- discourse 111-114
- discourse-analysis 134ff, 143ff
- epiphora 59-65, 418-438
 - exemplification 428-429
 - it 419-420
 - notation of 242
 - patterns of cross-reference 429-434
 - reduction to anaphora 60-63
 - replacements 434-438
- figures 206ff
- file of sentences 63-64
- footnote-numerals 64, 197
- formulas (see: immunology sublanguage)

- grammatical categories
 - and referentials 77-81
 - and variables 88-90
 - in operator grammar 126-127

- immunology sublanguage (see also: meta-scientific segments)
 - ambiguity 180-182
 - extensions of 167ff
 - formulas 143-144
 - grammatical specification of 161-167
 - local operator modifiers 144-145
 - sentence type 138ff
 - sentence type listing 133-134
 - subclass 143
 - subclass listing 155
 - synonymy 177-79
 - word-class 136-138
 - word-class listing 152

- implicit sentence 19-23, 35, 233-34 (see also: assumptions)

- information 125, 133

- interrogative 69-70, 83-84

- introducer (see: announcer)

- linearization 132

- local operator modifier (see: immunology sublanguage)

- metalanguage 37, 120, 133-134

- metalinguistic character of cross-reference 36ff

- metalinguistic referentials 37

- meta-scientific segments 158-161, 459-465 (see also: M, M', M'')

- methods section 158, 441-446

- operator grammar 125ff

- operator indicator 127, 188f

- paraphrase 45-47
 - listing of rules 250
- pro-forms 10ff (see also: grammatical categories, wh-pro-forms)
- proper names 12-13
- quantification 53, 91ff
- reading 8-9, 27 (see also: ambiguity)
- reconstructions and reductions 128ff
- referend 16ff
- referent 27ff
- referential
 - as occurrence of phrase 10ff
 - compared with referring expressions 25ff
 - considered as functors 81-83
 - enumeration of 241ff
 - in meta-scientific segments 466-468
 - in science-language sentences 456-459
 - independent identification of 10-14
- referential chain 16, 246
- referential classifier (see: classifier)
- referential relation (see: cross-reference)
- regularization 113-114
- regularizing operations 119-120, 134ff (see also: discourse-analysis)
- relative clause 65-69, 70-71
- "repeated" sentences 446-453
- replacement of referential 47-49 (see also: adjustments)
 - compared with rule of substitution 90-91
 - double 49
 - quasi- 32, 55
 - simultaneous and ordered 53-54, 398-399

- scientific sublanguage 115-120 (see also: immunology sublanguage)
 - contrast with dialect and style 116-117
 - contrast with fragments 121-122
 - examples of 118-120
 - social setting of 115-116, 121
- semantics, weak and strong 24, 44
- sentence 4-7 (see also: classifier-sentence, implicit sentence)
- so 406-407
- subclass (see: immunology sublanguage)
- sublanguage 115ff (see also: immunology sublanguage, scientific sublanguage)
 - base subset as 153
 - comparison with Carnap 172-173
 - definition of 116-117
 - ungrammaticality 173-177
- sublanguage analysis 134-143, 145ff (see also: classification of words, discourse-analysis, regularizing operations)
- syncategoremata 84
- synonymy 179-181 (see also: immunology sublanguage)
- tables 123, 200ff
- tacit referential (see: zero-referential)
- text 7, 23-24 (see also: discourse)
- text organization and cross-reference 438-453
- text types 114-115
- textlet in respect to referential 7
- that which 70-71
- the (see: definite article)
- transformations 134, 139-140, 148-151 (see also: regularizing operations)

variables 85ff
 compared with referentials 87ff
 considered as referentials 84, 85, 91

wh- constructions 70-71 (see also: relative clause)

wh- interrogative 69ff

wh- pro-forms 65ff

word-class (see: classification of words, immunology sub-language)

zero-referential 14-16, 225ff, 399ff (see also: announcer, classifier)

zeroing 128-130
